

Professional Statement

As a dynamic and results-driven project manager with over 10 years of experience, I have a proven track record of leading cross-functional teams and delivering technology projects that ensure security and compliance. My expertise spans industries such as healthcare, finance, and government, where I've spearheaded initiatives involving HRIS migrations, cloud deployments, and risk management frameworks. My key strengths include performance metrics reporting, risk mitigation, and process optimization, all while maintaining operational efficiency.

I am passionate about the evolving landscape of cybersecurity, especially in the era of artificial intelligence and automation. I have actively engaged in cybersecurity tasks throughout my career, such as implementing military-grade security standards for U.S. military applications, ensuring SOX compliance during SAP deployments, and leading PCI compliance audits. At RBC, I collaborated as part of the second line of defense, assisting with business risk assessments and advising on GDPR, business continuity planning, and cybersecurity measures.

As I pursue my CISSP certification, I am eager to deepen my expertise in protecting organizations and their stakeholders from emerging threats. I aim to apply my strengths in creative problem-solving, leadership, and continuous learning to help companies, especially within government, fintech, and highly regulated industries, strengthen their cybersecurity frameworks and navigate the complex security challenges of the digital age.
